

An important message from the Chairman of Antioxidant Pharmaceuticals Corporation (“APC”) about a new product

The FDA has officially approved a crucial health claim for olive oil, based on its high content of monounsaturated fat.

Medical Scientists have known for some time that monounsaturated fat can greatly improve atherosclerotic arteries: it can safely lower cholesterol, safely raise good (HDL) cholesterol, and safely decrease bad (LDL) cholesterol. Following is the actual FDA approved claim:

“...Limited and not conclusive scientific evidence suggests that eating about 2 tablespoons (23 grams) of olive oil daily may reduce the risk of coronary heart disease due to the monounsaturated fat in olive oil...”

Antioxidant Pharmaceuticals Corporation has brought the world’s best olive oil to the market. Best for salads, all cooking including frying, baking, and broiling. **Your Foods will get you applause at Breakfast, Lunch and Dinner!** Olio Chiaro!™ makes the best tasting food. And it is the most healthful because it has the highest percentage of monounsaturated fat, and does not contain the types and quantities of rancid, peroxidized fats present in other oils.

Olio Chiaro!™
“the clear oil”

This is Olive Oil at its best. It is the only one that is free of the types and quantities of rancid, fat peroxides present in other oils. If you separate out these rancid components via a “sophisticated filter”, it will look like the black tar that fills the oil filter from the crankcase of your automobile. You certainly would not consume even a little bit of such rancid oil. Not only is the taste highly objectionable, the health consequences of consuming foods and oils that contain rancid fats are serious: the arteries are damaged and atherosclerosis can accelerate; the Immune System may not be able to function in defending against infections and Cancer; the Central Nervous System may also be damaged. Don’t risk eating rancid, peroxidized fats. They’re far more injurious than “trans fats”, and cholesterol which are also absent.
